1. Personal Information	
Name	Liaqat Paindah
Email	Liaqat.paindah@gmail.com
Phone	0702079812
Address	Kabul, 13th district, 10015
GitHub / Portfolio (optional)	https://github.com/Liaqat-Paindah
Website / Personal Projects (optional)	GitHub & private demos available upon request
Education	Bachelor of Information Technology Kabul Education University – Kabul, Afghanistan Dates: 2015 – 2018

2. Technical Skills	
Programming Languages	TypeScript, JavaScript (ES6+), PHP, SQL
Web Development	Next.js (App Router, SSR, ISR, Server Components), React.js, Vue.js, Nuxt.js, Node.js, Express.js, Laravel, RESTful APIs, Microservices Architecture
Mobile Development	Backend & API architecture for Android and iOS applications
AI & ML	Prompt Engineering, AI-assisted features, LLM integration, AI-driven workflows
Databases	PostgreSQL, MySQL, MongoDB, Supabase, Redis, Query Optimization, Indexing
DevOps / Tools	Docker, Docker Compose, AWS (ECS, S3), GitHub Actions, CI/CD Pipelines, Nginx, Cloudflare, Git, Postman

3. Experience	
Dates (Month/Year – Month/Year): May 2025 – Present	Job title: Senior Full Stack Engineer Company Name: Allneeda.com Location: Remote (USA) Reference: Available upon request Key Responsibilities: • Led end-to-end architecture and development of scalable Next.js 15+ applications using SSR and ISR, achieving Core Web Vitals scores above 95 • Designed and implemented secure, high-performance REST APIs with Node.js, JWT, OAuth2, and RBAC for multi-tenant systems • Architected real-time systems using Supabase subscriptions and row-level security

	• Developed complex geospatial solutions using Google Maps APIs (radius search, polygon filtering, autocomplete) • Built analytics and KPI dashboards using Chart.js • Enforced security best practices against XSS, CSRF, and SQL Injection, maintaining zero critical vulnerabilities
Dates (Month/Year – Month/Year): February 2023 – Present	Job title: Software Developer Company Name: MgtWell Consulting Services (FAO–UN Projects) Location: Kabul, Afghanistan Reference: Available upon request Key Responsibilities: • Designed and developed enterprise-grade web applications using React and Laravel • Integrated authentication systems, payment gateways, and third-party APIs • Implemented location-based services using Google Maps APIs • Automated data pipelines and backend workflows to improve reliability and performance • Led testing, QA, and deployment processes • Mentored junior developers and coordinated delivery across cross-functional teams
Dates (Month/Year – Month/Year): May 2024 – December 2024	Job title: System Developer Company Name: ARDHO Location: Kabul, Afghanistan Reference: Available upon request Key Responsibilities: • Designed micro services-based systems using Laravel and Node.js • Implemented Event-Driven Architecture with Redis Pub/Sub • Integrated Clerk (authentication), Stripe (payments & webhooks), and Uploadthing (file management) • Orchestrated containerized deployments with Docker and AWS ECS Fargate • Optimized SSR applications using Next.js and Nuxt.js
Dates (Month/Year – Month/Year): September 2021 – December 2022	Job title: Full Stack Developer Company Name: Gulnegar Company Location: Kabul, Afghanistan Reference: Available upon request Key Responsibilities: • Built scalable SPAs and SSR applications using Vue 3 and Next.js

	• Developed modular backend services using Laravel and Node.js • Integrated Stripe Connect, Twilio SMS, and Resend email services • Optimized frontend performance and Core Web Vitals • Established Git workflows and CI best practices

4. Projects (Very Important) **(Please list the most relevant projects — especially marketplace platforms, mobile apps, AI-integrated apps.)**	
Project Name: Service Marketplace Platform	Project Name: Service Marketplace Platform Description: Full-scale marketplace platform connecting service providers and customers with requests, reviews, messaging, and payments Stack Used: Next.js, Supabase, PostgreSQL, Stripe, Tailwind CSS Role: Lead Architect & Full Stack Engineer Link: Private / Demo available upon request
Project Name: HRMIS – MgtWell Consulting Services	Description: Enterprise Human Resource Management Information System supporting HR operations including employee records, attendance, contracts, payroll inputs, reporting, and role-based access for international NGO projects. Designed for data accuracy, auditability, and secure multi-role workflows. Stack Used: React, Laravel, PostgreSQL, REST APIs, Tailwind CSS, Docker Role: Lead Full Stack Engineer & System Architect Link: Private (Organization Internal System) –hrs.mgtwell.com
Project Name: HRMIS – ARDHO	**Description:** Modular HRMIS platform developed to manage staff profiles, recruitment workflows, leave management, performance tracking, and administrative reporting. Implemented scalable backend services and secure authentication for NGO operational use. **Stack Used:** Laravel, Node.js, PostgreSQL, Redis, Docker, REST APIs **Role:** System Developer & Backend Lead **Link:** Private (Organization Internal System) – hrs.ardho.org
Project Name: Gulnegar– Business & Service Platform	Description: Company website and internal service management platform including CMS features, service listings, client inquiries, and performance-optimized frontend with secure backend integrations. Stack Used: Vue.js, Laravel, MySQL, Tailwind CSS Role: Full Stack Developer Link: NA
